Re: Termination of Administrative Order on Consent
Docket No. RCRA-8-2000-13

Dear Mr. Robinson:

By letter dated July 14, 2003, EPA approved the report titled *Final Comprehensive Groundwater Quality Evaluation Alliant Techsystems - Former Dry Creek Road Facility* submitted by Alliant pursuant the above-referenced order on consent (AOC). As noted in that letter, EPA has two remaining data concerns that EPA is confident will be addressed through remedial work that Alliant has agreed to conduct under the oversight of the Colorado Department of Public Health and Environment.

Paragraph VII.B.9 of the AOC requires that Alliant submit a final report that contains a summary and analysis of the investigative data gathered, and a description of the remaining data needs. EPA is satisfied that the existing data is adequately described in the each of the four investigation reports (indoor air, 2-phase extraction treatment system, soil vapor and ground water) and that the other purposes of the final report have been met through the development of the corrective action plan submitted to CDPHE for remedial work (CAP). EPA, therefore, determines that the data contained in the four reports, the information in the CAP and EPA's input into the CAP constitute the final report required by the AOC and that Alliant has satisfactorily completed each of the requirements of the AOC.

Therefore, pursuant to section XXV of the AOC, this letter serves to terminate the AOC. Please refer to section XIV for a description of Alliant's ongoing record preservation responsibilities.
